Lock Phish out.

Spotting the bait is a great start. A Protection Pack makes sure one click doesn't cost your business, built around what you actually need.

What can go in your pack

Multi-factor authentication
A second check at login, so a stolen password isn't enough on its own.

Microsoft 365 protection
Safer settings for your email, files and Teams.

Email security
Filters that catch more of Phish's bait before it reaches anyone.

Device security
Protection and updates for the laptops and phones you rely on.

Cyber Essentials
The UK government-backed certification customers and insurers look for.

Staff awareness
Simple habits like Stop. Spot. Report. for everyone.

How it works

1

Book a chat
A short conversation with a Unity advisor about your business.

2

Get your plan
Clear recommendations, in plain English, with no jargon.

3

Lock Phish out
We set it up and stay on hand as your security partner.

Don't take the bait. #DontTakeTheBait
