

Leasing System

Analyse leasing business results and make financial decisions accordingly. AI Software's lease analysis system provides businesses with reporting and statistical tools that can be interdependently on preference. Monitor pipelines, reports datasets and more.

Customisable dashboard feature to suit business colours and logo. Turn data into useful insights, merge business data in minutes. Visualise and analyse data, focus on KPIs across the organisation, enable valuable insights.

Simply manage the leasing process - from quote to the execution of the contract and reporting.

Our system enables businesses to track quotes, navigate tools, following a strategic process of fulfilment and management.

Features & Benefits

1. Full integrated management, that creates quotes, applications prepare instalments and keep track of contracts. Input quotes, utilise prepopulated lists, that can be amended to adapt to your business.
2. Automate and track clients. View clients and monitor contact management and communication. Identify what needs doing next for clients and rest of leasing aspects. Handling customer inquiries faster, giving competitive advantage.
3. Document e-signature element to reduce human error, to ascertain correct signatures in the right places. Some errors associated with signatures will be eradicated.
