

# Time & Attendance System

The system is designed to help your business by enabling companies to better control of their employees. It measures time and attendance, holiday, sickness and absence recording, management and authorisation.

Easy to use software that can be implemented and integrated quickly and easily to any business environment, to become the forefront for employees.

Main characteristic of the system is its integral integration with payroll solutions. Linking real time data with payroll solutions enables accurate payments to be executed, reducing chance of miss calculation and errors. Reducing costs and ensuring less time consuming processes.

Accurate and flexible real-time tracking, makes time and attendance a breeze with the limited likelihood of errors.

## Features & Benefits

1. Access anywhere aspect is ideal for remote workers in any business, enabling full access anywhere anytime with added features of location tracking and ease of use. The system has built in configurable and flexible technology that fits any and all company needs.
2. Readily compatible on multiple devices, with both desktop based portal and mobile friendly device accessibility.
3. Additional audit trail features, that enables businesses and organisations to view and track audits and payroll behaviour, whilst also monitoring aspects of maternity / paternity leave, sick pay, holiday pay and more.

**If you think your organisation could benefit from this solution  
we would love to hear from you**
